

## Grease separator EasyClean ground NS 10, Auto Mix, 975-1165 mm, D

## **Article information**

Item no.: 93010/120D-DSP-TS GTIN: Price group: 60

## Description

## **Advantages**

- Program-controlled rinsing device
- Customisation possible through control unit
- Low-maintenance operation

The separator for greasy wastewater for underground installation consists of a grease separator and an engineering chamber. The two-piece system made of permanently resistant polymer (PE) is equipped with an integrated sludge trap and an integrated sampling device. Access for cleaning and maintenance work is provided by inspection openings, with polymer upper sections for continuously adjustable height and level compensation. The innovative Shredder-Mix-System with integrated macerating system is responsible for homogenising and circulating the tank contents. Cleaning takes place via an exterior submersible pump which is installed in a separate engineering chamber and can be disconnected from the tank by a shut-off valve. A direct disposal pipe socket is available for odour-neutral manual disposal. The fully automatic program run is controlled by a user-friendly control unit with multi-line display that can be integrated into the building management system through a potential-free contact. The control unit with 10 m long cable is installed in the engineering chamber in the factory. Cleaning and disposal can be started remotely using the remote control. Thanks to the customisable cleaning program with fast-selection function, cleaning can be adapted to the local circumstances as required. Observance of the Drinking Water Hygiene Directive can be guaranteed through the fully automatic rinsing of the drinking water pipes. The refill inlet and solenoid valves must be installed in a dry room on site. The connections between the grease separator and the engineering chamber as well as the reserve conduits and the connections must be made on site. (see connection set 917421). A load distribution slab must be installed on site for load class D. The reinforcement drawings are available from KESSEL. 20 year polyethylene warranty.

Net weight:	800 kg
Gross weight:	820 kg
Groundwater resistant from lower edge of base	1320 mm
section:	
Max. length:	4490 mm
Installation depth:	975 - 1165 mm
Type of height adjustability:	vertically adjustable upper section, can be tilted by
	5 degrees
Required access area, length:	3065 mm
Required access area, width:	1235 mm
Packaging dimension:	length
Packaging dimension:	width
Packaging dimension:	height
Tapl/duain bady	
Tank/drain body	1000
Distance pipe bottom outlet to tank bottom:	1030 mm
Distance pipe bottom inlet to tank bottom:	1100 mm
Outlet nominal size (OD):	160 mm
Outlet nominal size (DN):	150 mm
Inlet nominal size (OD):	160 mm
Inlet nominal size (DN):	150 mm
Connection inlet/outlet sockets:	PE-HD pipes in accordance with DIN 19537, PVC-KG
Clear width of entry (LW):	pipes in accordance with DIN 19534, PP or AS 600 mm
	000 11111
Coverage features	
Type of cover:	Cover plate
Cover material:	Grey iron
Colour of cover:	black
Width of cover:	659 mm
Height of cover:	122 mm
Length of cover:	659 mm
Locking:	locked
Load class:	D 400 (EN 124)
Tightness:	odour-tight and surface water resistant
nghthood.	
Wastewater contents	
Separator contents:	1600 l
Total volume:	2600 l
Contents of sludge trap:	1000 l
Storage quantity of grease:	400 l
Duraning device	
Pumping device	
Pump:	SPF 300 IP68
Number of pumps:	1
Weight, pump:	44 kg
Connection type:	Direct connection
Protection class:	
Insulation class:	F
Protection class (pump):	IP 68
